Addigreen Technology

Dear Oscar,

I am writing you this letter in reference to your product we have been using in our truck fleet during the past two years.

We began adding your fuel additive to our truck fuel tanks in March 2019, and since then, we have seen an overwhelming increase in performance throughout our fleet. Our drivers report that their trucks are more responsive and seem to be operating with less vibration and engine noise.

Our accounting department has seen a reduction in fuel costs by more than 35% in aggregate and we believe much of that is due to your product increasing engine performance and overall efficiency. We also see that our repair costs on our vehicles have significantly declined and have noticed that our emissions reports show a substantial reduction in CO2 and other pollutants. In fact, since using your product, not one truck has missed passing an emissions check.

In closing, we could not be happier with your product, as it saves us money on fuel costs, makes our drivers happier with better vehicle performance, and reduces the amount of service required on all our vehicles.

Thank you for introducing us to this exceptional product.

Best of luck with your future endeavors and we look forward to evaluating your new products as they become available.

Respectfully,

Jim Coughtree
Manager
